

Clarington Active Transportation Master Plan

Notice of Study Commencement

Clarington

February 15, 2024 | Public Notice

About the Study

The Municipality of Clarington has initiated a project to develop an Active Transportation Master Plan (ATMP). The Municipality has retained WSP Canada Inc. to support the development of the ATMP, which is scheduled to be complete by the summer of 2024. The scope of the ATMP includes:

- Develop a vision, strategic direction and goals for active transportation in Clarington.
- Develop a proposed active transportation network based on evolving design guidance, including proposing cycling infrastructure, proposing shared pedestrian/cycling infrastructure, and developing recommendations/guidance for pedestrian infrastructure improvements.
- Develop an equitable approach to the implementation of active transportation infrastructure across Clarington.
- Identify high-priority projects and develop a 15-year phasing plan for all active transportation recommendations.
- Develop policies and guidelines for accessibility, amenities, and a wayfinding system for active transportation users.
- Collaborate with local stakeholders, residents and external partners to ensure that priorities are feasible and well-supported by the community.

Study Process

The ATMP will be completed in accordance with the Master Plan process outlined by the Municipal Engineers' Association, adhering to the requirements of Phase 1 and Phase 2 of the Municipal Class Environmental Assessment.

How You Can Get Involved:

Public and stakeholder input will be a critical part of developing the ATMP. During the initial phases of the project, Clarington will be engaging with the community through a survey and mapping exercise to better understand the preferences and route suggestions of residents. To learn more about the ATMP and stay up-to-date on engagement opportunities, go to www.clarington.net/ATMP and register for project updates. You may also contact the project team below with any questions or comments.
